THE JEWISH EDUCATION PROJECT

Building Jewish Pride

Jewish Pride is the ability to live with Jewish confidence, rooted in a connection to Judaism that adds value and meaning to one's life.

Educating with intentionality towards these outcomes of Jewish Pride means creating opportunities to cultivate and activate Jewish identity, connection, and engagement.

By building Jewish Pride, learners will:

1. Develop a positive and confident Jewish self-image
2. Value complex Jewish identities, both personal and communal
3. Recognize how Jewish identity shapes engagement with the broader world
4. Express Jewish identity across multiple contexts and relationships
5. Draw upon Jewish history, wisdom, values, and practices in daily life
6. See oneself within the collective story of the Jewish people
7. Cultivate a strong sense of commitment to the Jewish people
8. Nurture intergenerational connections and relationships
9. Embrace complexity, nuance, and multiple perspectives as part of Jewish tradition
10. Foster a meaningful relationship with Israel
