A significant number of day school and yeshiva high school graduates spend the year after high school studying in Israel. To assist these students in learning about the Israeli program options available to them, representatives of many seminaries and yeshivot from Israel come together in NY and NJ for evening open house programs in November. These programs allow high school seniors, together with their parents, in one evening, to learn about two or three Israeli programs to which they may be inclined to apply.

The Jewish Education Project coordinates the schedule for these events on an annual basis. Each NY / NJ host school determines which Israeli schools attend their program.

If you have any questions, please contact Shelley Hill.

Please be aware that the schedule below was established pre-COVID-19 and the events will instead be going virtual. Please contact the host schools regarding details of the actual events.
