

## Dreidel Reading Practice

### Instructions:

Each student spins the dreidel. Follow traditional dreidel rules where each student starts by putting one piece of gelt in the middle of the circle. Then students rotate spinning the dreidel to see which letter they land on. Students can collect no gelt for nun, half the gelt for hey, all the gelt for gimmel and put one in for shin (or pey).

In this version, after each roll, the students will read a word from the list of words that begin with the letter that they spun. In order to determine which word to read, students should roll a dice. Bonus if the students can find the words in the image on page 3 (easier when printed in color).
